MEMORANDUM FOR CHAIRMAN, ARC

SUBJECT: Transmittal of Geodetic Control Points

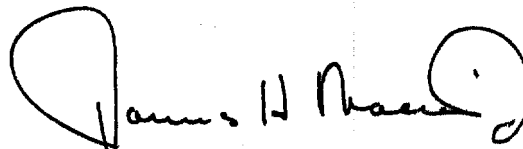

1. Reference is made to Draft Memorandum, subject "Requirement for Geodetic Accuracy", dated 4 February 1958, paragraph 11. The desired information has been plotted on the attached 17 WAC Charts.

2. The geodetic control points (astronomical and triangulation) shown on these charts are those points which are available and offer the possibility of photo identification for establishing greater geodetic accuracy.

3. An operation covering the maximum number of these points would provide the greatest probability for increasing the geodetic accuracy of targets in the areas being considered.

4. In addition to the control points, targets in the Air Target Material Program have been indicated on these charts. Information directly related to the geodetic control of these targets is of prime importance to the successful application of all weapon systems.

1 Incl  
17 Wac Charts

  
JAMES H. MACIA, JR.  
Colonel, USAF  
Directorate of Intelligence
